

PRESS RELEASE

ELO Digital Office at the CeBIT `2012 in Hall 3, Stand F30:

Mobile and flexible into the future of ECM

Stuttgart, 24 January 2012 - ELO Digital Office's participation at this year's CeBIT is characterized by mobile and flexible work methods in the field of enterprise content management (ECM). To this end ELO will be presenting at Stand F30 in Hall 3 a new app which has been custom-made for the Apple iPad. Visitors will be able to see for themselves how simply and efficiently important documents and business processes can be managed on the portable tablet. The Stuttgart ECM producer will also be presenting the Lotus Notes Edition of its DMS Desktop package for Microsoft Office. In addition it will be shown how you can create—with just a few mouse clicks—custom solutions for contract or meeting management. Everyone who is interested is warmly invited to live demonstrations of these innovations at the stand.

Touchscreens have totally revolutionized daily work. They essentially allow you to physically "get your hands" on your data. Particularly predestined for this are tablet computers like the bestselling Apple iPad. ELO has now developed an app for the iPad which has been precisely customized for its user interface. With the ECM app users can access their information from wherever they are and even take along documents and files for offline viewing. Going far beyond the basic ability to access data, the app solution also provides an exceptionally large economic benefit: the iPad even lets you directly manage business processes and workflows.

ECM for Lotus Notes

In the modern-day workplace Microsoft Office has become the de facto standard. What this software lacks, however, is comprehensive support for document management. This is precisely the need which ELO DMS Desktop is designed to fulfill. It meshes perfectly with the various Microsoft Office applications and provides powerful tools for efficient document management. A highlight of it is that ELO even integrates Lotus Notes users into this solution.

PRESS RELEASE

Thereby users get a uniform management concept across all application platforms.

Custom Management Solutions

In order to work efficiently each day without needless delays, specialized applications are getting more and more important. Whether the subject is contract, meeting, or project management, solutions need to be customized to precisely meet the needs of each company to ensure efficient work processes. Custom business intelligence should not only provide support to the user, but should also provide automated tools to take over common tasks. This is why ELO has developed new add-ins for its applications. In addition to their built-in business logic for specific industries, they can be easily adapted to individual requirements.

Practice-proven business solutions from various certified ELO Business Partners will also be presented. Registered thus far are ACTIWARE, BCIS IT-Systems, busitec, exe GmbH, Fluctus IT, id-netsolutions, Kriesten, MODUS Consult, as well as Soft-Trade.

PRESS RELEASE

ELO Digital Office GmbH

ELO Digital Office GmbH develops and sells high-performance software solutions in the areas of electronic document management, digital archiving, and workflow management and covers the entire spectrum of Enterprise Content Management (ECM). The ELO[®] product family consists of three software packages: ELO*office* is the entry-level DMS solution for small businesses. The modular client/server framework of ELO*professional* is aimed at mid-sized companies. The high-end solution ELO*enterprise* is platform independent, highly scalable, as well as multi-tenant capable and is especially powerful when utilized by data centers and for portals. Each of these are fully compatible with one another, allow file exchange between each other as well as seamless upgrades to different levels at any time.

ELO Digital Office GmbH originated as a spin off from Louis Leitz and became an independent company in 1998 with headquarters in Stuttgart, Germany. ELO now has an international orientation with subsidiaries in Europe, Asia, and Australia. With its dense network of system partners, over 450,000 installations are currently being supported worldwide. In addition, ELO maintains numerous technological partnerships with software and hardware manufacturers such as Fujitsu, Hewlett-Packard, Kodak, Kyocera, Microsoft, and Sun Microsystems.

ELO products are found in use by various organizational branches and large companies, such as: Airbus, Alstom, EADS, EnBW, HSG Zander and also diverse government agencies, etc. More information can be found at: www.elo.com.
