

# ELO for Smartphone

*The mobile ELO ECM solution for your business*

## Mobility without borders

### **User Friendly and Seamless Integrated**

Access your documents conveniently from anywhere, without wasting any time: the **ELO for Smartphone** solution gives you mobile access to your **ELO** document management system. Wherever you are and whatever kind of network access you have, you can navigate easily through your archive, search for documents and view them on the display. With the powerful **ELO** workflow functions integrated into your smartphone, you can release tasks on the move. As a mobile user, you can then work dynamically and fully integrated into your corporate processes.

## Secure Connection to the Server

Security is pre-programmed into the ELO for Smartphone solution. After all, when you access your company archive, you may be retrieving very sensitive data and information such as invoices and contracts. The HTTPS protocol ensures that the connection between ELO and the business smartphone does not allow any kind of abuse. Mobile users sign on to the ELO server with their access details, ensuring that only authorised users have access. If you wish, the application can also log off automatically after a specified period of inactivity.

## ELO ECM archive – independent from the operating system

The ELO App technology based on browser-based clients. The clients are tailored to the relevant browser and accessible for all mobile operating systems. The user has access from their preferred device to the ECM company archive, and can search and edit documents as well.

## Extensive Application Integration

The ELO for Smartphone solution gives you access to all of your corporate information. This is provided by the integration of all the key business applications into ELO, including commercial applications (ERP), customer systems (CRM) and e-mail programs. This makes invoices, customer quotations and the accompanying correspondence available on your smartphone display by fingertip control.

## Powerful Searching of the Archive

The connection between ELO and the business smartphone enables powerful and accurate searching of the whole ELO system as well as all connected business applications.

The user simply types in the search term on the keypad in the same way as searching the Internet. The search request is sent to the **ELO** server and the results are set out clearly on the display.

### **Clear Focus on Tasks**

The exchange of information between **ELO** and your smartphone ensures that all pending tasks are always clearly visible. You are notified immediately of any new tasks. A very useful benefit is the way the tasks in the list can be sorted by priority. In this way, you know immediately what is important and what can wait to be addressed. With a fingertip on a task, you can see all the information about it, either keywording information or the document itself.

### **Seamless Integration into your Processes**

With the **ELO for Smartphone** solution, your processes do not stop when you leave the building. Pending workflow tasks can be assigned directly via the smartphone. This means that the tasks are not left alone, but can be processed or released directly by the user. This significantly reduces throughput times.

### **Convenient Display**

The **ELO for Smartphone** solution displays your information in a user-friendly way. With a fingertip you can switch between the archive, search and task work areas. The task and document lists make a clear view of all details and priorities possible. The document view gives you an overview of all your documents, with direct access to the metadata.

### **The Benefits are Obvious**

The advantages of the **ELO for Smartphone** solution are obvious. Your employees have unlimited mobile access to all relevant corporate information. This speeds up processes, reduces throughput times and permanently increases the personal productivity of your staff. The intuitive and visually appealing interface is fun to use, and there is no need for any training. Users are brilliantly supported in their day-to-day work in the mobile and digital world.
